

York University
Toronto, Ontario

Size: 6' x 14'6"

Total Square Footage: 87

Project Information:

Architecture:

- Custom colour aluminum framing system, granular recessed panels and clay tile roof combine well and compliment existing buildings on campus.
- Spandrel glass panels allow privacy for the washroom while still providing a continuous "window band" around the kiosk.
- Two horizontal sliding windows allow easy communication with incoming and exiting traffic lanes.
- Layout includes main attendant's area with forward facing plastic laminate work counter & storage cabinet.

Technical:

- A side entrance slider door allows attendant to exit and enter the kiosk safely without swinging a door into a traffic lane.
- The "Mansard" style roof is actually a perimeter parapet wall designed to hide the roof mounted air conditioner system.

"Providing Shelter from the Storm"
