

C-4000 SERIES
CUSTOM TICKET KIOSK

Building Size: 15'-6" x 15'-6"
Project Duration: 8 weeks

INNOVATIVE DESIGN MEETS REALITY

PROJECT OVERVIEW:

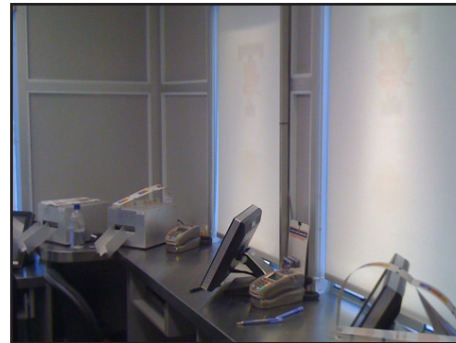

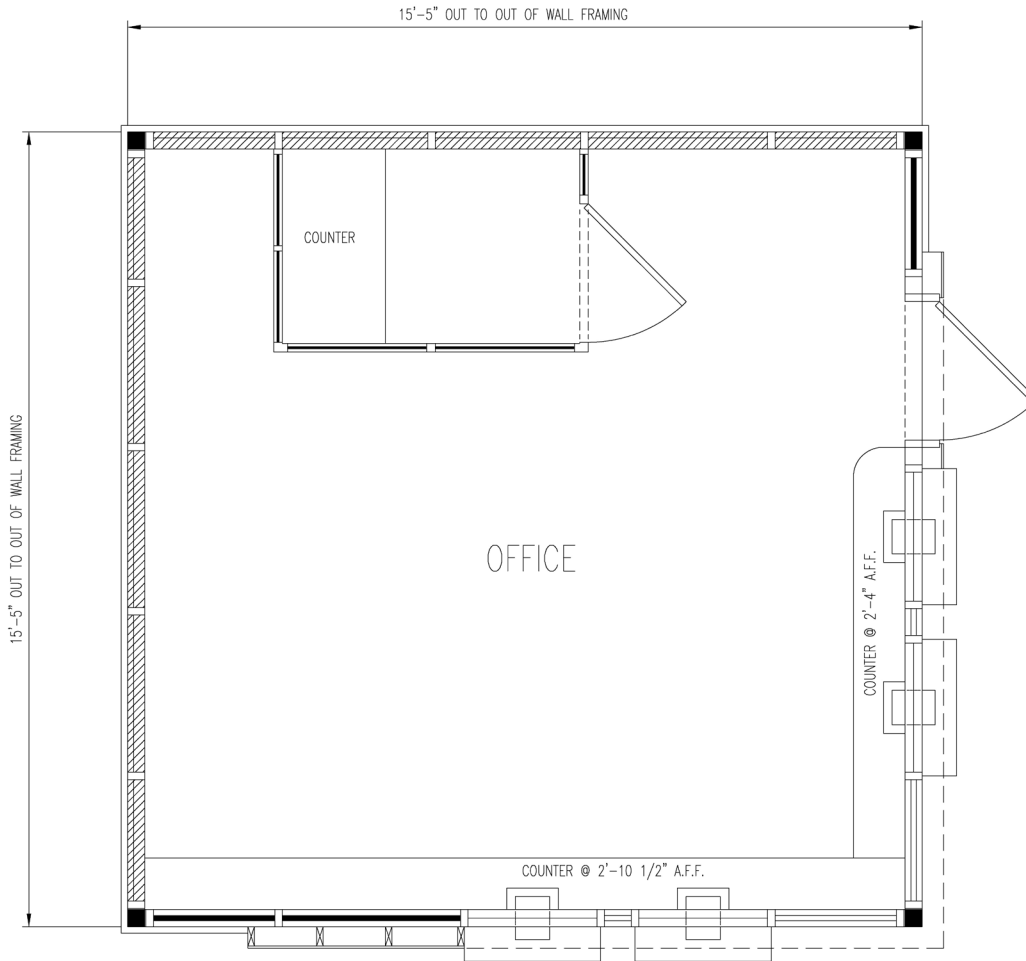

The University of Toronto was in need of an attractive, stand alone booth for Varsity Stadium event ticket sales. The booth design needed to house as many as four ticket sales staff to deal with large volumes. NRB worked with the University's designer and came up with an innovative "retro" design. The University's original desire was to site-build the ticket booth but the modular solution was less expensive. A modular concept built off-site allowed the campus to continue with regular daily activities and experience minimal disruptions.

FEATURES & BENEFITS:

- Patterned stainless steel walls
- Wall mounted dome lights and extended structural steel design frame
- The colour scheme was carried over from their new score board and stadium accents
- Two wickets were positioned lower for wheel chair accessibility

SELECTION • STYLE • SECURITY • SPEED

FLOOR PLAN

Our expert sales staff can analyze your site, record architectural components and features. Then Canada Kiosk will propose a concept with a floor plan and coloured rendering - for your approval. No obligation. Renderings assist in the site plan approval.
