AN NRB COMPANY

PROJECT PROFILE

Pay Shelter

Series: #C-2000

C-2000 SERIES DOMETOP PAY SHELTER

Building Size: 4'-0" x 4'-0"
Project Duration: 4-5 weeks

RENDERING... TO REALITY

Keep Customers dry with A/C or Solar Powered Payment Equipment.

PROJECT OVERVIEW:

Parking lot automation is a popular trend. When surface lots are fitted with new payment equipment, clients often discover the need to protect equipment and their paying clientele. Our "C2000" DomeTop shelter system provides a dry and protected area out of the wind for customers completing their transaction.

FEATURES & BENEFITS:

- Clear anodized aluminum frame/panels for a maintenance free enclosure.
- Tempered glass wall panels for maximum visibility and safety.
- Optional interior light with built-in photo-cell for night time use.
- Clear polycarbonate dome roof for maximum light and modern appearance.
- The "C2000" DomeTop shelter can be modified to accommodate various styles of solar powered payment equipment.

STANDARD A/C POWERED

Pay machine mounted in the shelter protecting equipment and payee.

CUSTOM SOLAR POWERED

Pay equipment must have an unrestricted exposure to ambient light. We design your shelter to suit your specific solar equipment.

Our expert sales staff can analyze your site, record architectural components and features, then design and propose a concept with floor plan and coloured rendering (for your approval). No obligation. Renderings assist in site plan approval.
